DETAILED ACTION

1. Applicant's Amendment filed on July 06, 2006 in response to Examiner's Office Action has been reviewed. Claims 1-12 have been canceled, and claims 13-32 have been added.

Allowable Subject Matter

2. Claims 13-32 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:
The prior art of record fails to teach or suggest individually or in combination searching through the plurality of type determining function entries, reading at least type determining function referred to by the at least one read type determining function entry, and determining whether a stored processing component corresponding to the at least one read type determining function is suitable for use as a processing component as set forth in independent claims 1, 22 and 28.

Dependent claims 14-21, 23-27 and 29-32 being further limiting to the independent claims 13, 22 and 28 respectively are also allowed.

The closest prior art, Hillis et al. US Patent Application Publication No. 2005/0086188 teaches organizing knowledge in different types and categories that users can find and create their own versions of each of the components. The closest prior art fails to anticipate or render Applicant's limitations above obvious.
